

## The benefits of Hoyalux iD WorkStyle

- + Perfect and effortless vision indoors
- + Exceptionally wide intermediate and near viewing zones
- + Comfortable and crystal clear viewing
- + Relief from eye strain

**Hoyalux iD WorkStyle V+** lenses are recommended with BlueControl. **BlueControl** is a unique coating treatment which protects your eyes from harmful blue light emitted by screens.

## We care about your eyes

Like fingerprints, no two eyes are exactly the same. HOYA's approach to your vision is also one of a kind. The better you see, the more you reduce eye strain. More natural vision even helps to relax the brain and improve concentration.

HOYA has developed an extensive portfolio of award-winning lenses, to cater for individual lifestyles and needs.

## Perfect vision at work

If your visual tasks are based predominantly around near vision, standard progressive lenses may not offer quite the support you need. **Hoyalux iD WorkStyle V+** lenses are specifically designed to provide you with perfect vision for close-distance activities at work. In addition to having a pair of regular glasses, **WorkStyle V+** lenses can be used for specific activities that demand extra visual attention.

## Choosing the right lens design

**Single vision** lenses are designed to give you a clear viewing zone within a standard reading distance, which may not be sufficient to meet your visual needs at work.

**Multifocal** (also known as Progressive) lenses provide vision from distance to near and are a great all-rounder option. However, they may not provide the widest and most comfortable vision when working on computers or in near zones.

Single vision lenses

Standard multi-focal lenses

HOYA offers a wide range of **WorkStyle V+** lenses designed to truly meet the needs of today's modern lifestyle. With different designs to suit your individual needs, the result will help alleviate eye strain and even reduce eye fatigue.

## Solutions for your indoor work environment

Your eye care professional will recommend the most appropriate **WorkStyle V+** lens design to suit your work environment.

### Hoyalux iD WorkStyle V+ Space

Ideal for people who spend a significant amount of time in front of a screen, attending meetings and are mobile in the workplace. The **Space** design provides sharp and wide vision at the computer whilst still providing the ability to walk around indoors. It's also a great lens for around the home. Space offers excellent vision up to **4 metres and above**.

### Hoyalux iD WorkStyle V+ Screen

The **Screen** lens design is the best choice for people that spend any longer than 2 hours at a time on a computer or screen. The lens design is perfect for those with large or multiple screens whilst still providing the ability to see clearly **up to 2 metres**.

### Hoyalux iD WorkStyle V+ Close

The **Close** lens design is perfect for people who use tablets or compact laptops as their main device, hobbyists and professionals that require high levels of precision. Wearers will benefit from the widest possible near vision, whilst still being able to perfectly view distances **up to 1 metre**.
