

Do you want comfortable,
relaxed vision when
working in the office?

EXPERIENCE CLEAR VISION, ALL DAY.

Hoyalux Desk lenses are specifically designed for those who require vision correction in the near and intermediate viewing zones.

The unique design of Hoyalux Desk allows you to experience clear vision when looking up-close, and viewing items near and around you. The lens also allows for a distance area of vision unlike standard reading lenses. This means you won't have to take your glasses off when moving around the office, reducing the inconvenient task that is often related to reading lenses. If you want to combine a wide and comfortable view of your immediate surroundings with clear depth of vision, Hoyalux Desk is for you.

Benefits to you:

- ✓ Provides all day comfort and convenience, in all working conditions
- ✓ Helps prevent eye fatigue and irritation, as well as headaches
- ✓ Removes the repetitive task of taking your reading lenses on and off all day
- ✓ Can be worn in any indoor environment
- ✓ Fast adaptation between near and intermediate viewing
- ✓ Standard with UV Protection
- ✓ Available with Double-Sided scratch resistant protective hard coating as standard

KEY

- Desk glasses
- Standard Computer glasses
- Standard Reading glasses

For more information on how Desk lenses can improve your indoor vision, ask your local optometrist.
