

## Safety Frame Portfolio Expansion

### Power Range Increase

---

HOYA is expanding its current lens power range to +10/-10 with -6 cylinders for a new range of safety frames. This enables us to have an option for those people with this type of lens prescription.

**The current frame range will NOT utilise this increased power, only the new frames listed in this document, and the current frame range power range will remain as +6/-6 with -6 cylinders.**

## Frame Range

HOYA has four frames in this extended power range all of which use an rx insert to house the prescription lenses behind the actual frame. The frames used are the new range of Ugly Fish frames – Slim, Ultimate, Cruise and Glide all with rx insert.

These styles of frames are the most suitable for these types of prescriptions.

## Pricing

For Australian based customers the price of these frames are as follows:-

Ugly Fish frames, with Insert, are \$50AUD plus GST

For New Zealand based customers the price of these frames are as follows:-

Ugly Fish frames, with Insert, are \$55NZD plus GST

From a lens point of view, **ANY** lens index or material can be used except for any glass lenses, this includes stock lenses.

## Availability

All four frames are supplied with the frame, rx insert, foam gasket and case. At this stage, only a clear lens in the frame range is offered.

## ADDITIONAL POINTS:

- These frames have been tested and are CERTIFIED to 1337.6.2012. Supporting paperwork is provided.
- Lens options includes Bifocal, Single Vision, Indoor Lenses and Progressives. Hard Coat and VP available
- Transitions and Sun IQ or tints are NOT available in this frame range
